Education

Veermata Jijabai Technological Institute Matunga,Mumbai
Third Year B.Tech in Electronics & Telecommunication Engineering | CGPA: 8.49 *Sep 2024–May 2028*

Ramnivas Ruia Junior College Matunga,Mumbai
HSC: 87.33% | MHT-CET Percentile: 99.41 *Sep 2022– May 2024*

St. Joseph's High School Wadala,Mumbai
SSC: 92.80% *June 2021-March 2022*

Projects

NotesFlow – AI Powered Notes Management Platform GitHub Demo *Jun 2026 – Present*

- Built a full-stack AI-powered notes platform using React.js, Node.js, Express.js, MongoDB, JWT Authentication, and Gemini 2.5 Flash.
"'
- Implemented secure authentication, CRUD operations, note search, AI summarization, daily rate limiting, and responsive dark/light theme support.
- Deployed the application on Vercel and Render with MongoDB Atlas, enabling scalable note management through RESTful APIs. "'

Resume-JD Matcher GitHub Demo *Feb 2026 – Apr 2026*

- Developed an AI-powered multilingual Resume–Job Description matching platform using SBERT (all-MiniLM-L6-v2), Cosine Similarity, Streamlit, and Gemini 2.5 Flash.
- Implemented semantic resume screening, skill-gap analysis, salary prediction, AI assistant, and multilingual resume processing with explainable recommendations.
- Outperformed traditional ATS and baseline models (TF-IDF, Word2Vec, BERT), achieving 92.5% accuracy, 89.7% precision, 96.0% recall, and 92.8% F1-score.
- Secured user authentication using SHA-256 password hashing and generated visual analytics for candidate evaluation.

Aithentic: Deepfake Detection System GitHub Demo *Dec 2025 – Feb 2026*

- Built a web application using Streamlit to detect deepfake images and videos using machine learning.
- Utilized a hybrid architecture combining CNN (EfficientNet-B3) and Bi-LSTM for robust feature extraction and sequence analysis.
- Integrated MobileNetV3 for optimized performance and faster inference in image-based detection tasks.

Technical Skills

Languages: C++, JavaScript, Python
Frameworks Libraries: React.js, Node.js, Express.js, Pandas, NumPy, Matplotlib, PyTorch, OpenCV
Databases Storage: MongoDB
Technologies: REST APIs, JWT Authentication, Gemini API
Developer Tools: Git/GitHub, VS Code, Postman, Google Colab, Jupyter Notebook

Certifications

Mathematics for Machine Learning: Linear Algebra *Aug 2025*
Imperial College London (Coursera) Verify Certificate

- Mastered core linear algebra concepts including Orthogonal Projections, Eigenvalues, and Eigenvectors for Data Science applications.
- Developed a strong mathematical foundation in vector spaces and basis transformations, essential for high-dimensional data processing.
